University: Punjab University College of Information Technology (PUCIT)

Department: Data Science

Course: Software Engineering (SE) – Fall 2026

Deliverable: D1 – Group Agreement

Component: Game Platform (Front-End)

BSDSF24M004
BSDSF24M022
BSDSF24M034

D1 – Group Agreement

Course: Software Engineering (SE) – Fall 2026
Deliverable: D1 – Group Agreement
Team Members: Zainab Tariq (BSDSF24M004), Saneela Aziz (BSDSF24M022), Hifza Zia (BSDSF24M034)
Component: Game Platform (Front-End)

---

a. Who We Are and What We Are Good At

Zainab Tariq (BSDSF24M004)

Zainab is good at making websites look nice. She knows HTML, CSS, and JavaScript. She can design clean and easy-to-use screens. She also knows how to use GitHub. She likes making things look good and work well for users.

Saneela Aziz (BSDSF24M022)

Saneela is good at solving problems and writing code. She knows JavaScript and how to think through hard problems step by step. She is good at finding and fixing bugs. She likes making sure the game works correctly.

Hifza Zia (BSDSF24M034)

Hifza is good at writing documents and keeping things organized. She can write clear notes and plans. She knows how to use Trello and how to keep the team on track. She also knows some basic front-end coding.

Our Team Strength

We are a good mix. Zainab is good at design. Saneela is good at coding and logic. Hifza is good at organizing and writing. Together we can build the front-end of the Game Platform. We will help each other and make sure everyone learns something new.

---

b. Why We Are Interested in This Course

Zainab: She wants to learn how real teams work together. She wants to get better at front-end design by building a game.

Saneela: She wants to see how ideas turn into real working software. She likes the full process from planning to testing.

Hifza: She wants to learn about project management and how to write good requirements. She wants to learn how to handle team problems like free-riders.

All of us: We want to work on a real project where we don't just code. We want to plan, talk, and solve problems together. That is what this course is about.

---

c. What Grade We Want

We want to get a good passing grade (G). We don't just want to pass. We want to make a good Game Platform that is well-made, well-tested, and well-documented. We want to be proud of our work. We believe if we work together and help each other, we can do well.

---

d. Roles and Responsibilities

The D1 file says we should NOT split into "only coders" and "only writers." So we will all do a bit of everything. All three of us will do the same amount of work. No one will be overworked. No one will be left out.

Our First Roles

Scrum Master / Coordinator — Saneela
Saneela will plan meetings, manage the Trello board, and check our progress. She will talk to the Scrum Coach. She will also make sure everyone is on the same page.

Requirements Lead — Zainab
Zainab will lead the work of figuring out what the Game Platform should do. She will write user stories and keep the task list. She will also think about what the user needs.

Design and UI Lead — Zainab
Zainab will lead the design work. She will draw wireframes and decide how the game will look and feel. She will make sure the game is easy to use.

Integration and Testing Lead — Saneela
Saneela will plan how our front-end connects to the other group's Game AI. She will write test cases and check that everything works.

Documentation Lead — Hifza

Hifza will take care of D1, D2, and D3 documents. She will write meeting notes and make sure we submit things on time. She will also help with requirements and keep the Trello board updated.

Equal Work for Everyone

We will all do about one-third of the work. Here is how we will share the work equally:

Work Area	Zainab	Saneela	Hifza
Requirements	Leads UI needs	Gives technical input	Writes and organizes requirements
Design	Main designer	Gives feedback	Writes design notes
Coding	UI, CSS, HTML	Game logic	Small code and integration support
Testing	UI tests	Logic tests	Writes test results
Integration	Helps with UI	Leads integration	Supports coordination
Documents	Helps write	Checks technical parts	Leads writing
Trello	Updates UI cards	Updates tech cards	Manages board and meeting notes
GitHub	Uploads UI code	Uploads logic code	Uploads docs and small fixes

Work Area	Zainab	Saneela	Hifza
Meetings	Attends and participates	Leads meetings	Attends and takes notes

If someone has too much work, the others will help. If something is too hard, we will do it together.

Role Changes

Roles will change every sprint. At the end of each sprint, we will talk and decide who does what next. This way everyone learns different things. The Scrum Master role can also change each sprint if someone else wants to try it.

---

e. Tools We Will Use (Besides Trello)

Trello — Our main board for tasks. Columns: Backlog, To Do, In Progress, Testing, Done.

WhatsApp or Discord — For quick questions and daily chats. We will make a group.

Google Meet or Zoom — For online meetings when we can't meet in person.

GitHub — For saving and sharing code. We will use branches and pull requests.

Google Docs — For writing documents together before submitting.

Google Drive — For sharing files like wireframes and PDFs.

We will also keep a burndown chart to see our progress.

---

f. Rules We Agreed On

Meetings

We will meet every Monday at 12:00 PM. We will also have a short daily check-in on WhatsApp in the morning. Sprint planning will be at the start of each sprint. Sprint retrospective will be at the end of each sprint. Scrum Coach meetings will be as scheduled. Client meetings will happen when needed.

Being on Time

Everyone must come to meetings. If you can't come, tell the group at least 2 hours before. If you are more than 10 minutes late without telling anyone, it counts as absent. If you miss more than 2 meetings without a good reason, we will talk about it.

Talking to Each Other

Reply to messages within 4 hours between 8 AM and 10 PM. Be polite and helpful. If you disagree with something, talk about it in the meeting. If it's still not solved, ask the Scrum Coach.

Making Decisions

We will try to agree on everything together. If we can't agree, we will vote. Two votes out of three wins. If there is a tie, the Scrum Master decides after hearing both sides.

Quality

All code must be checked by at least one other person before we add it. All documents must be checked by at least two people before we submit. A task is "done" when it is coded, tested, checked, and written down.

Sharing Work

Work will be shared fairly. Each person does about one-third. If someone has too much, others will help. Everyone will do some coding and some writing.

---

g. What If Someone Doesn't Do Their Work (Free-Rider)

We hope this never happens. But if it does, we will do this:

1. The Scrum Master will talk to the person in private. Maybe they have a problem we don't know about.
2. If it continues, we will talk about it in a team meeting. The person can explain and improve.
3. If it still continues, we will write a warning in the meeting notes. We will set a deadline for improvement.
4. If nothing changes, we will tell the Scrum Coach and the teacher. We will show proof like Trello activity, meeting attendance, and GitHub commits.

5. At the end of the course, we will give honest peer reviews. Free-riders will get lower ratings.

We want to solve problems inside the team first. But we also believe everyone must do their fair share.

---

h. When and How We Will Work Together

We will work in three sprints.

In the first sprint, we will figure out requirements, do design, and start coding. We will meet in person at least twice a week. We will have daily online check-ins.

In the second sprint, we will write specifications, code more, and get ready to integrate. We will do pair programming for hard parts and review each other's code.

In the third sprint, we will integrate with the other group, do risk analysis, testing, and finish the project. We will have longer meetings if needed.

All the time, we will use Trello daily, commit code often, and talk on WhatsApp or Discord.

We will meet face-to-face for planning and big discussions. We will meet online for daily check-ins and quick questions. We will write documents and update Trello on our own time.

---

i. Other Registration Assignments We Discussed

Kanban Board URL (K1): We will make a Trello board and share the link.

Group Agreement (D1): This document. We will submit it on time.

Artefacts (D2): We will make wireframes and user stories.

A1: We will complete this assignment.

Initial Questionnaire: We have completed it on Studium.

Project Details: We have read the project details. We understand the game platform and game AI parts.

We will also read all course information on Studium carefully and keep track of deadlines.

---

j. First Tasks

Task	What We Will Do	Who Will Do It
T1	Make Trello board and add everyone	Saneela
T2	Write D1 Group Agreement	All
T3	Submit D1 on Studium	Hifza
T4	Figure out what Game Platform needs	Zainab and Saneela
T5	Draw wireframes for Game Platform	Zainab
T6	Make GitHub repository	Saneela
T7	Research how to connect to Game AI	Saneela and Hifza
T8	Get ready for Scrum Coach meeting P1	All
T9	Start coding the basic layout	All
T10	Prepare first artefacts for D2	All

Signatures

We agree to follow this Group Agreement. We will work together with respect and responsibility during this course.

Name	Roll Number	Signature	Date
Zainab Tariq	BSDSF24M004	_____	21-09-2026
Saneela Aziz	BSDSF24M022	_____	21-09-2026
Hifza Zia	BSDSF24M034	_____	21-09-2026

Note: We can update this document during the course if all members agree. Any changes will be written down and signed by all three of us.

Summary: How We Will Share the Work Equally

Work Area	Zainab	Saneela	Hifza
Requirements	Leads UI needs	Technical input	Writes and organizes
Design	Main designer	Feedback	Notes
Coding	UI, CSS, HTML	Game logic	Small code and support
Testing	UI tests	Logic tests	Test documents
Integration	UI help	Lead integration	Support coordination
Documents	Help write	Check tech parts	Lead writing
Trello	Update UI cards	Update tech cards	Manage board and notes

Work Area	Zainab	Saneela	Hifza
GitHub	UI code	Logic code	Docs and fixes
Meetings	Attends and participates	Leads meetings	Attends and takes notes

All three of us will do about one-third of the total work. We will check at every sprint meeting to make sure the work is balanced. If someone is doing more, we will fix it. If someone is doing less, we will help them catch up. Roles will change every sprint so everyone learns different things.
